

# **DISTRICT CITIZEN ENGAGEMENT PLAN SUMMARY**

## **Central Lombok District**

### **District Vision**

To create creative and quality human resources in Loteng and prioritise good morals in relationships. All boys and girls will be educated and none will be neglected or without education. The poor will receive good quality and affordable health services. Farmers will be more effective, have a good quality of life, be self sufficient for food and develop competitive local industry units.

The government will be transparent and accountable in carrying out its function to service the community well and uphold the law using justice. Development from planning, budgeting through to monitoring will be participative, democratic and supportive to women and the poor.

The region will be developed well and proportionally, whilst maintaining a healthy environment and incorporating local knowledge that is good for the community.

Management and utilisation of natural resources will be participatory, effective and efficient in prompting independent and sustainable development in Central Lombok district.

### **Agenda in Cooperation with the District**

1. Upholding the community's basic rights to ensure a good community.
2. Communities in the areas of Rinjani and Mareje Bonga' Lestari forests will have a decent quality of life.
3. Professionally managed development of Central Lombok tourism based on turning local resources into Indonesian tourist icons.
4. Creating Central Lombok as the 'NTB 2010 Meat and Food Barn'.

## **SUMMARY OF CONCEPT PAPERS – Central Lombok**

---

-1-

**District : Central Lombok**  
**Name of Institute : Jaringan Masyarakat Sipil (JMS), West Lombok**  
**Concept Paper Title: Capacity Building of Health Cadre to Prompt a Clean and Healthy Lifestyle (PHSB) in Kopang Rembiga District**  
**Program Duration : 18 months**

Berugak Dese, as a community organization involved in achieving the district citizen engagement plan vision in Central Lombok district has designed an action plan. This action plan aims to strengthen community health cadre to increase their capacity to facilitate and to prompt the community to participate in planning, implementation and monitoring and evaluation processes in order to instigate improved clean and healthy lifestyles; control health services and develop independence in developing clean and healthy lifestyles. It is also hoped that there will be opportunities for health cadre, village governments and other service and health actors to develop transformative processes in regard to information, skills and effective communication as well as developing networks with other stakeholders to prompt improved clean and healthy lifestyles. This action plan will be developed in five villages (Kopang Rembiga, Bebuak, Lendang Ara, Waja Geseng, Montong Gamang) in Kopang Rembiga sub-district. Strategies will consist of capacity building, developing working networks and pushing for comprehensive service centres for women and children. It is hoped that this action plan will work in synergy with the four main elements in local good governance, particularly in improving quality of public services and participation. The strategic direction of this action plan, which is to empower village facilitators to initiate community participation and community engagement with other stakeholders in order to achieve the action plan objectives and expand the influence of the project into five other villages, is in line with ACCESS Phase II.

-2-

**District : Central Lombok**  
**Name of Institute : Konsorsium Lombok Tengah**  
**Concept Paper Title: Accelerate Development by Strengthening Local Institutes and Policy Advocacy**  
**Program Duration : 30 months**

This action plan aims to strengthen the capacity of local institutes (village facilitators and supporting facilitators groups) to provide early input into budget policies so that the policies are supportive of women and the poor. This will involve prompting local institutes to engage to influence policies to be transparent in implementing and using funding for education, free health, infrastructure, economy and empowerment. This action plan will also prompt an increased role and participation of the community to monitor policy budgeting and implementation in the previously mentioned areas. It will also prompt Konsorsium Lombok Tengah member institutes to apply transparent and democratic values that support women and the poor into their regulations. Konsorsium Lombok Tengah will use strategies consisting of capacity building, public policy and budgeting analysis, policy advocacy and the formation of community complaint units. This action plan hopes to contribute to increased participation, transparency and accountability, and

improve the quality of public services and social justice. This action plan is in line with ACCESS Phase II in its efforts to empower village and sub-district facilitators to strengthen the community to initiate engagement and improve their quality of life. This action plan will also have a wide impact as it will be developed in seven sub-districts, which are Praya Timur, Batukliang Utara, Praya Barat Daya, Pringgarata, Jonggat, Janapriya and Praya Tengah in Central Lombok district.
